

## Cultural Information – Scaevola

(skee-VOH-luh)

Hardy to Zone 10 and higher for outdoors.  
Full sun, grows to 8" in container, minimum temperature 50°, blooms in spring,  
summer and fall.

<b><u>Light:</u></b>	Full sun, a southern exposure.
<b><u>Temperature:</u></b>	Maintain indoor temperatures above 40°.
<b><u>Humidity:</u></b>	Preferably 50% or higher; however, they will tolerate low levels with no harm.
<b><u>Watering:</u></b>	Bring soil to a state of visual dryness between watering. When watering, thoroughly saturate soil until a little water runs out of the bottom of the pot. Growing in a clay pot will help maintain a healthy root system.
<b><u>Fertilizer:</u></b>	Fertilize with ½ tsp of fertilizer per gallon of water once a week. Use a balanced fertilizer like a 15-15-15 or a blooming fertilizer like a 7-9-5.
<b><u>Pruning:</u></b>	Prune anytime growth is excessive or in the spring or late winter so as to not disrupt flowering.
<b><u>Insects and Disease:</u></b>	Resistant to most insects and diseases.
<b><u>Comments</u></b>	Flowers in the longer day-length of summer. A great plant for summer mixed containers or hanging baskets. They need warmer light to flower well and high soil fertility.
