

Cultural Information – Cereus
 (KER-ee-us)

<u>Light:</u>	Full or partial sun, a southern, eastern or western exposure.
<u>Temperature:</u>	Maintain indoor temperatures above 60°.
<u>Humidity:</u>	Tolerant to a wide range of relative humidity.
<u>Watering:</u>	Bring soil to a visual dryness between watering. Can tolerate long periods of dryness. Water more in summer and less during the winter.
<u>Fertilizer:</u>	Feed with a low level fertilizer during growth in the summer with a balanced fertilizer no higher than 15-15-15. Discontinue in winter or when light levels are low.
<u>Pruning:</u>	Little pruning needed
<u>Insects and Disease:</u>	Few problems with insects. Can have root disease problem if kept too wet.
<u>Comments</u>	An easy to grow cacti that really can thrive on neglect. Be sure to give it a sunny spot to grow in.
